

TLJL Side-shift Shredder weight model

The universal TLJL flail mower is a machine generally used for shredding grass and pruning, ideal for uncultivated areas. The machine is provided with a connecting plug with three points, reason why it can be used with any kind of tractor, both caterpillars and farm tractor. The hydraulic displacement (max 45 cm) allows the employment both in normal and in decentralized position, to approach to plantings, to orchards, etc.
